OILFIELD SERVICES GUYANA INC.

**PRODUCTS
& SERVICES**

SERVING THE GUYANA OIL & GAS INDUSTRY

Jaguar Oilfield Services Guyana, Inc. was formed in 2017 by three companies (see right) who recognized that their experience in providing quality industrial products, with strong after sales service in country, was exactly what the emerging oilfield needed.

This new Guyanese company builds on a foundation of serving local industries with a combined experience of almost 100 years. Many of the products and services now offered by Jaguar come directly from other Guyanese industries to oil and gas, for example slinging and rigging. Others come from quality international suppliers who also offer products used by the oilfield, for example instrumentation, not yet imported into Guyana.

Jaguar provides its products and services from a shop and warehouse facility in Georgetown, near the offshore supply base serving Exxon and its offshore operations.

Jaguar parent company histories of providing exceptional products and services to customers' industries is a strong foundation as Guyana develops its own oilfield service industry. A quality, local supplier network and strong ties to the community are additional Jaguar strengths.

CONTACT US

See how Jaguar quality products, and dedication to customer service can help your business in Guyana.

Farfan & Mendes Ltd. has been operating in Guyana since 1960, and was officially incorporated in July 1967.

The company evolved into a reliable supplier of industrial equipment, including machinery for the timber industry, the wood working industry and the agricultural industry, as well as chemical fogging equipment, power tools, tyres for most types of vehicles, pulling and lifting systems, among others.
